## **Message from the Chief Executive Officer**

The City of Nedlands has adopted its budget for the 2005/2006 financial year. Council has been able to apply a zero average rate increase, whilst still maintaining current services programs and making improvements to others.

Rates are used to fund the maintenance of the City's infrastructure, including roads, footpaths, parks, gardens, community and sporting facilities, as well as paying for many community services such as libraries, youth and aged care initiatives and refuse collection. When ascertaining how much funding is required from rates, Council works out the total cost of services and how much revenue is available from other sources, such as grants, subsidies, fees and charges.

How much each ratepayer contributes towards the total rates is determined by the gross rental value (GRV) of their property multiplied by the rate in the dollar. GRV is the total rental (net rent plus outgoings) that a property would receive if rented for twelve months and is determined and reassessed by the State Government's Department of Land Information once every three years. As 2005/2006 is a revaluation year, the GRV of every property in the City of Nedlands has been reassessed.

The Council sets the rate in the dollar (the same rate is applied to every property) which when multiplied by the valuation determines the amount of the rates payable. If there has been a change in the GRV then the rates could increase or decrease differently to the rate in the dollar set by Council.

As 2005/06 is a revaluation year and on average gross rental values across the City have increased, to achieve an average rate increase of 0% the rate in the dollar has been reduced, from the previous year, to compensate for the valuation increase. Valuation changes are not uniform across the City.

CHIEF EXECUTIVE OFFICER

1		<p><b>SIGNIFICANT ACCOUNTING POLICIES</b> The significant policies which have been adopted in the preparation of this budget are:-</p>																														
(a)		<p><u>The Local Government Reporting Entity</u> In accordance with Australian Accounting Standards, for the purposes of budgets and financial reports, the reporting entity includes all activities of Council and any other entities controlled by Council. All internal transactions and balances of the reporting entity have been eliminated to enable the reporting of the Council as a single unit. Money or other assets over which Council has custody but not control are held in trust and reported separately.</p>																														
(b)		<p><u>Trust Fund</u> Council receives funds as an agent for other organisations such as the Building Construction Industry Training Levy.</p>																														
(c)		<p><u>Basis of Accounting</u> The budgets have been drawn up in accordance with accounting concepts, standards and disclosure requirements of the Australian accounting bodies, the Local Government Act 1995 and Local Government (Financial Management) Regulations 1996. They have been prepared on the accrual basis under the convention of historical cost accounting.</p>																														
(d)		<p><u>Assets</u></p>																														
(i)		<p><u>Depreciation</u> All non-current assets having a limited useful life (i.e. excluding freehold land) are depreciated over their estimated useful lives in a manner which reflects the consumption of the service potential embodied in those assets. Depreciation is recognised on a straight line basis, using rates which are reviewed each reporting period. The major depreciation periods are:</p>

(e)		<p><u>Rates</u> The rating and reporting periods coincide. All rates levied for the year are recognised as revenues.</p>																					
(f)		<p><u>Grants, Donations and Other Contributions</u> All grants, donations and other contributions have been recognised as revenues during the reporting period, and the expenditure of those monies has been provided for in the manner specified under the conditions upon which the Local Government received those monies.</p>																					
(g)		<p><u>Investments</u> All investments are valued at cost and interest on those investments is recognised when accrued.</p>																					
(h)		<p><u>Provisions for Employee Entitlements</u> The provision for employee entitlements relates to amounts expected to be paid to employees for long service and annual leave, and is based on legal and contractual entitlements and assessments having regard to the experience of staff departures and leave utilisation. Current wage rates are used in the calculation of the provisions.</p>																					
(i)		<p><u>Superannuation</u> The Local Government contributes to the Local Government Superannuation Scheme to match contributions to the fund made by employees. Contributions are also made in respect to the Superannuation Guarantee for which employee contributions are voluntary. Contributions are charged against income.</p>																					
(j)		<p><u>Comparatives</u> Comparatives are prior year actual, and prior year budget to current year budget. Prior year actual figures are as they stand at the time of adoption of the budget. They have not been audited and do not necessarily represent final figures for the prior year.</p>																					

Number	Regulation	Note																																																																																				
1 (k)	15 (3)	<p><u>Rounding of Figures</u> All budget and comparative actual figures have been rounded to the nearest dollar.</p>																																																																																				
2		<p><u>CHANGES IN ACCOUNTING POLICY</u> The financial reports of the City of Nedlands will need to comply with the International Financial Reporting Standards that became effective from the 1st July 2005. At this stage it is not known what the impact of these changes will be but they will not impact on the Rate Setting Statement or change the outcome for determining the setting of rates in the annual budget.</p>
