DO NOT SPRAY GLYPHOSATE REQUESTS

This online form provides the Community with the opportunity to register on the “Do Not Spray Register”. Once registered, the City’s staff and contractors will avoid the use of Glyphosate weed treatments on verges immediately adjacent the registered property.

When requesting to be placed on the Do Not Spray register it is required that you agree to undertake hand or other weeding techniques to satisfactorily retain the amenity of the verge in a weed free state between the property and the kerbline. Submission of a request constitutes acceptance of this requirement.
